

Leprechaun Trap Family Project

It will soon be St. Patrick's Day and those pesky leprechauns will be up to their old tricks! Leprechauns like to sneak around, make messes, and play tricks on people! This year, we are going to try to outsmart those sneaky little guys!

Your family's job is to build a leprechaun trap so we can try to catch one! Remember, leprechauns are tricky creatures, so our traps will need to be clever! Use things around the house, such as: a shoebox, cereal box, etc. Leprechauns are attracted to the color green and love shiny things! Construction paper, glitter, and crayons or markers can also be used. Work on this as a team and be creative!

We will be setting up our traps so please be sure it is completed and returned to school by _____! Have fun working with your child to create an original trap and use your imagination! I can't wait to see the amazing ideas you come up with!

**Thank you and good
luck!**
